

Service and Repairs

Your ACCURIST watch is guaranteed against defects in materials and workmanship for a period of 2 years from the date of purchase. During this period, we will exchange or repair, at our discretion, any defective components free of charge.

IMPORTANT - Not covered by Guarantee

1. Batteries, straps and bracelets.
2. Damage caused by accident, misuse or lack of care.
3. Water penetrations except in watches marked as "Water Resistant".
4. Unauthorised repair and general wear.

SERVICING AND REPAIRS UNDER GUARANTEE

Please post your watch, together with the Retailer's Sales Receipt or proof of purchase, the completed Guarantee slip, and a brief note to explain the nature of the fault, by Registered Post or Recorded Delivery to the address shown. Do not send the presentation box as this will NOT be returned.

SERVICING AND REPAIRS OUTSIDE OF GUARANTEE

Available at a reasonable charge after an estimate has been sent by T.P. (UK) Ltd. Send your watch to us by Registered Post or Recorded Delivery to the address shown.

Important Note

It is important to identify your watch correctly. If, after reading this Instruction Guide, you have any further questions regarding the use, operation or adjustment of your watch, please call us during office hours on 0116 288 2500, email service@accurist.co.uk or visit our website www.accurist.co.uk.

T.P. (UK) Ltd, Alexander House, Chartwell Drive, Wigston, Leicester LE18 2EZ
United Kingdom.

Water Resistance

If your watch is water resistant, it will clearly state "Water Resistant" or have a static water pressure indication (e.g. "30/50/100/200 metres") on the dial and/or case back.

If it is not marked as water resistant, it should not be allowed to come into contact with water or be worn in conditions that could expose it to moisture (e.g. washing, heavy rain etc.). Certain chemicals in water may damage the watch seals. To maintain water resistance, we recommend that your watch is serviced and re-sealed at least every 12 months by T.P. (UK) Ltd.

IMPORTANT

Buttons must not be operated while in contact with water.

WATER RESISTANT or RESISTANT TO 30 METRES

Suitable for normal everyday use and will resist exposure to splashes and rain; it is NOT designed to be used whilst bathing or swimming.

WATER RESISTANT TO 50 METRES

As 30 metres plus bathing or swimming.

WATER RESISTANT TO 100 METRES

As 50 metres plus pool side diving and snorkelling, but not high board or scuba diving.

WATER RESISTANT TO 200 METRES

As 100 metres plus scuba diving, but not high board diving.

Digital Instructions

Setting 12hr/24hr format

- When entering the 12hr/24hr setting display, the current selection will be flashing. Press the 'D' button to select either 12-H or 24-H format.

- Press the 'B' button to confirm all changes made to the time, date and 12hr/24hr settings and return to the standard timing display.

Setting the alarm feature

- From the standard timing display, press the 'B' button until the alarm display is shown. **NOTE:** the watches covered in this manual have 3 individual alarms labelled AL1, AL2 & AL3 and each alarm can be set for different times in different time zones independently.

Digital Instructions

Setting the alarm feature continued

- When the alarm display is shown, press the 'C' button to select which time zone to set the alarm in.

- Hold down the 'B' button for 2 seconds to enter the alarm settings mode.

- Now the alarm on/off display will be flashing. Press the 'D' button to select alarm ON or OFF. Press the 'C' button to continue.

- Now the hour display will be flashing. Press the 'D' button to increase the hour value to the desired time or hold down the 'D' button to increase the value quickly. Press the 'C' button to continue.

Digital Instructions

Setting the alarm feature continued

- Now the minute display will be flashing. Press the 'D' button to increase the minute value to the desired time or hold down the 'D' button to increase the value quickly. When the alarm is set correctly, press the 'B' button to confirm the alarm settings and return to the alarm display.

Using the stopwatch feature

- Standard and accumulated elapsed time measurement**
 - From the standard timing display, press the 'B' button until the stopwatch "CHR" display is shown. **NOTE:** the stopwatch measurement can time up to 10 hours.

Digital Instructions

Using the stopwatch feature continued

- Press the 'D' button to start the counter and press the 'D' button again to stop the counter. The counter can be started and stopped as often as required.

- When the counter has been stopped, press the 'C' and 'D' buttons together to reset the counter to zero "0".

Split time measurement (LAP)

- Press the 'D' button to start the counter, then press the 'C' button to split the timing into a LAP. Press the 'D' button at any time to stop the counter. **NOTE:** the counter will freeze for 10 seconds with the LAP time displayed but will continue to time in the background.

Digital Instructions

Using the stopwatch feature continued

- When the counter is stopped, press the 'C' button to cycle through and view the LAP times recorded.

- Press the 'D' button to return to the counter display. Press the 'D' button again to resume timing from the last point the counter was stopped.

- Press the 'C' and 'D' buttons together to reset the counter to zero "0".

- The stopwatch can record up to 10 LAPS. After the 10 LAPS have been recorded, any additional elapsed time will be added to the final LAP time.
- If the 'B' button is pressed at any time whilst the counter is running, the feature displayed will change but the stopwatch counter will continue to run in the background. To save battery life, it is important to stop the stopwatch counter before changing the feature displayed.

Digital Instructions

Using the countdown timing feature

- From the standard timing display, press the 'B' button until the countdown timer "TMR" display is shown.

- Press the 'C' button to enter the countdown timer settings mode. The timer display will now be flashing.

- Press the 'D' button to increase the countdown timer duration or hold down the 'D' button to increase the value quickly. **NOTE:** the maximum countdown duration is 180 minutes.

- During the countdown a tone will sound for every 10 seconds of elapsed time. During the final 10 seconds of the countdown a tone will sound for every second of elapsed time. Once the countdown is complete, an alarm tone will sound until any button is pressed.

Digital Instructions

Using the countdown timing feature continued

- Press the 'C' button to turn on/off the repeat countdown timer.  Symbol indicates the repeat countdown timer function is ON. **NOTE:** the repeat countdown timer function will automatically restart the same countdown once the timer reaches zero.

- Press the 'B' button to confirm and set the countdown timer. Press the 'D' button to start and stop the timer. **NOTE:** the countdown timer will automatically set if no button is pressed after 1 minute.

- To reset the countdown, first the timer must be stopped, then press the 'C' button to enter the countdown settings display followed by the 'B' button.

Analogue Instructions

Setting the time

- Pull the crown out to position 2.
- Turn the crown until the hands show the correct time.
- Push the crown back in to position 1.
